PROFESSIONAL SUMMARY

Full Stack Software Engineer with strong expertise in Python (Flask, FastAPI, Django) and JavaScript (Node.js, React, React Native). Experienced in building scalable web and mobile applications, designing RESTful APIs, and developing AI-powered systems. Skilled in backend architecture, database design, and cloud-based deployments using modern technologies including Next.js.

EDUCATION

Bachelor of Software Engineering 2021 – 2025

Capital University of Sciences & Technology, Islamabad

F.Sc (Pre-Engineering) 2019 – 2021

F.G. Quaid-e-Azam Degree College

PROFESSIONAL EXPERIENCE

Junior Web Developer & App Developer Oct 2025 – Present

Amal Learning

- Developing and maintaining fully deployed web and mobile applications using React, React Native, Node.js, and Next.js.
- Building full-stack features including frontend UI, backend APIs, and database integration.
- Working on live production projects, implementing features, fixing bugs, and optimizing performance.
- Developing cross-platform mobile apps using React Native for Android and iOS.
- Integrating RESTful APIs and third-party services.
- Participating in deployment and version control workflows using Git and modern development practices.

Software Engineer Intern Jul 2024 – Sep 2024

Hit Hub Solutions

- Developed and enhanced backend components for scalable web applications using Python, Flask, and Java.
- Designed and implemented RESTful APIs to ensure efficient system integration and data exchange.
- Integrated Firebase services for authentication, real-time database management, and secure storage.
- Optimized application performance through debugging, refactoring, and database query improvements.
- Collaborated in Agile development cycles including sprint planning, code reviews, and version control workflows.
- Assisted in deployment, testing, and maintenance of live production systems.

Automated Document Format Checking System

2024 – 2025

- Developed a web-based automation platform using Python, Flask.
- Implemented PDF parsing libraries to validate margins, fonts, spacing, alignment, and structural formatting rules.
- Integrated Firebase (Cloud Firestore) for real-time document tracking and storage.
- Deployed successfully on Streamlit Community Cloud.
- Achieved 100% validation accuracy under defined rule-based testing scenarios.
- Significantly reduced manual document formatting review effort through automation.

PROJECTS

Automated Book Generation System – Python, FastAPI, OpenAI API, Supabase

- Built an AI-powered system to generate structured books from user-defined topics.
- Developed backend APIs using FastAPI and integrated OpenAI for dynamic content generation.
- Used Supabase (PostgreSQL + Auth) for data storage and user management.
- Automated formatting and export of content into structured book outputs (PDF/Doc).

Library Management System – Java

- Built a desktop-based system to manage book records, issue/return tracking, and automated fine calculation using OOP principles.

E-Commerce Web Application – HTML, CSS, JavaScript, Firebase

- Developed a responsive e-commerce platform with authentication, product catalog, and cart functionality.

Online Quiz System – Python, Flask

- Designed a web-based quiz application with session management and automated scoring logic.

Banking Management System – Java / C++

- Implemented a console-based banking application handling account management and transaction validation.

Student Management System – C++ / Java

- Developed a CRUD-based academic record management system using object-oriented design.

TECHNICAL SKILLS

Languages:	Python, Java, C++, JavaScript, C
Frameworks:	Flask, FastAPI, Node.js, Django, Next.js
Frontend:	HTML5, CSS3, React.js, React Native
Databases:	Supabase (PostgreSQL), Firebase, SQL, MongoDB
Tools:	Git, GitHub, VS Code
Core Concepts:	OOP, Data Structures, REST APIs, System Design, Clean Code

PROFESSIONAL STRENGTHS

- Strong backend development and API architecture skills.
- Analytical problem-solving mindset with attention to performance optimization.
- Experience building automation and AI-powered systems.
- Adaptable, quick learner with strong collaboration skills.
- Exposure to real-world deployment and production-level environments.
